

GOUVES WATER PARK

HOLIDAY RESORT

Experiences

GLASS BOTTOM BOAT

Nemo is a glass bottom boat made entirely by GRP. It was launched under the strictest specifications for safety and comfort and its aim is to combine the enjoyment of the sea that a cruise can offer and, at the same time the magnificent experience of the underwater world exploration. It is fully equipped electronically by Furuno. Nemo has three decks: a top deck for sunbathing, a lower shaded deck and a deck where there are six bottom windows for underwater view. It is 14 metres long and there are two toilets on board.

You can enjoy a trip to the picturesque Saint George's Bay and the beautiful bays of Anissaras, Gourgouthia, Drapanos and Stalida. Exploring the Cretan underwater world, swimming to the sea cave and snorkelling among fishes are some of the trip highlights!

Information and bookings at your travel guide in the hotel.
